

Table System Documentation

Feature Demonstrations and Usage Examples

Example 1: Quick Tables with drawSimpleTable()

The fastest way to create a table from a 2D array.
Automatically handles page wrapping and column distribution.

Product	Price	Stock
Laptop	\$999	15
Mouse	\$25	50
Keyboard	\$75	30

Example 2: Manual Table Construction

Build tables row-by-row for more control over content.
All tables automatically wrap to new pages when needed.

Department	Manager	Location	Status
Sales	Alice Johnson	New York	Active
Engineering	Bob Smith	London	Active
Marketing	Charlie Brown	Paris	Active

Example 3: Professional Styling & Merged Cells

Corporate styling with custom colors, borders, and cell spanning.
Demonstrates professional invoice/report layouts.

Product	Price	Quantity	Total
Widget A	\$19.99	5	\$99.95
Widget B	\$24.50	3	\$73.50
Widget C	\$15.00	10	\$150.00
Total:			\$323.45

Example 4: Text Alignment Options

Each cell shows text positioned at that alignment.
Demonstrates all 9 combinations of horizontal and vertical alignment.

Left	Center	Right
Top-Left	Top-Center	Top-Right
Middle-Left	Middle-Center	Middle-Right
Bottom-Left	Bottom-Center	Bottom-Right

Example 5: Font Customization

Per-cell font control for emphasis and readability.
Supports Helvetica, Times, Courier with bold and italic styles.

Font	Style	Example
Helvetica	Regular	The quick brown fox
Helvetica	Bold	The quick brown fox
Helvetica	Italic	<i>The quick brown fox</i>
Helvetica	Large Bold	The quick brown fox
Times	Regular	The quick brown fox
Courier	Regular	The quick brown fox

Example 6: Financial Reports with Auto-Pagination

Quarterly financial data with automatic page breaks.
Headers repeat on new pages for multi-page reports.

Period	Revenue	Expenses	Net Profit	Margin %
Q1 2021	\$98,450	\$72,300	\$26,150	26.6%
Q2 2021	\$105,200	\$78,900	\$26,300	25.0%
Q3 2021	\$112,800	\$82,400	\$30,400	27.0%

Q4 2024	\$203,200	\$125,400	\$77,800	38.3%
Q1 2025	\$210,000	\$128,000	\$82,000	39.0%
Q2 2025	\$218,500	\$131,200	\$87,300	40.0%
Q3 2025	\$226,900	\$134,800	\$92,100	40.6%
Q4 2025	\$235,200	\$138,400	\$96,800	41.2%

Example 7: Automatic Text Wrapping

Long text content wraps automatically within cells.
Row heights adjust dynamically to fit multi-line content.

Feature	Description	Status
Text Wrapping	Automatically wraps long text content within table cells to fit the available column width without overflow	Active
Auto-fit Columns	Distributes available space proportionally across columns based on content requirements	Active
Custom Styling	Supports custom colors, borders, padding, and alignment options for individual cells or entire tables	Active

Example 8: Smart Font Sizing

Automatic font scaling prevents text overflow while maintaining readability.
Auto-shrink mode and scale-to-fit options with minimum size enforcement.
The middle column is intentionally narrow to demonstrate the scaling effect.

Mode	Example Text	Behavior
Auto-shrink	ThisIsAnExtremelyLongWordThatDefinitelyWillNotFitInTheCellWithoutScaling	Font size reduced automatically
Auto-shrink	Pneumonoultramicroscopicsilicovolcanoconiosis	Longest English word shrinks to fit
Scale-to-fit	The quick brown fox jumps over the lazy dog and runs through the forest	Scaled horizontally to single line
Scale w/ 6pt min	This is a very long text that will scale down but will not go below 6pt minimum font size	Enforces 6pt minimum
Scale w/ 3pt min	This is an extremely long text that will scale to a very tiny size with only 3pt minimum allowing much smaller text	Can become very small
Multi-line scale	Line 1: First line Line 2: Second line Line 3: Third line	Respects \n, scales each line
Bold + scale	Bold text also scales: The quick brown fox	Bold fonts supported
Italic + scale	<i>Italic text scales too: The quick brown fox jumps</i>	Italic fonts supported
